### Micro Chef's Blend

4 oz

Micro Chef's Blend is a mixture of microgreens and edible flowers that vary in shapes, colors, textures, and flavors. The small greens consist of leaves that range in appearance from heart-shaped with curved edges, flat and oval with maroon veining, to deeply lobed with a frilled texture. The leaves vary in color from dark green, purple, to a variegated mix of deep red and green hues, and the slender stems have a succulent nature, contributing to the green's crisp and tender consistency. The edible flowers are also small in size with yellow, red, violet, and purple hues. The flat, soft, and pliable petals are smooth and round, oval, or slender with tapered edges. Micro Chef's Blend provides a unique combination of earthy, green, and herbal flavors mixed with bright, spicy, citrus-forward, and garden-fresh nuances.
