

BLACK PEARL SEAFOODS®
PREMIUM QUALITY. EXCEPTIONAL TASTE.

Wild-Caught, Alaska COD FILLETS

Black Pearl Wild Alaskan Cod begins its journey in the cold, pristine waters off the coast of Alaska, where it is harvested far from shore using long-line fishing methods. **MSC Certified**, this Cod comes from a responsibly managed fishery that helps protect the resource for future generations. Once caught, each fish is brought aboard individually and frozen at sea within minutes of harvest, helping preserve its natural color, flavor, and texture. Upon arrival at our facility, the fish is expertly refreshed and filleted to deliver consistent quality year-round. Vacuum packaging helps retain moisture and freshness, extending the quality and appearance of the product from our facility to the customer's case.

Black Pearl Wild Alaskan Cod fillets are incredibly versatile, flavorful, nutritious, and reasonably priced. A source of high-quality protein and all nine essential amino acids, Cod continues to be one of the most popular fish choices for consumers.

Item #	Description	Size
53252	Alaska Cod Fillets, Boneless	1/5 lb
53210	Alaska Cod Fillets, Boneless	1/10 lb
